**Title:** good teacher

Who is the good teacher?

I think teaching is not just a job that people gain salary money from. It is a matter of morality, a value message and a entire life at school or university separated from home. students may love or hate going to school often depending on how teachers are good. Good teacher is inspire, kind, perfect, flexible and many merits other. In contrats, a bad teacher can destroy every positivity, each minimum of desire to keep going. But it is crucial to say that there is a third type of teachers which is in between good and bad who doesn't let neither positive nor negative side in student's memories. Finally, I am really grateful and thankful for teacher who inspired me more confident in myself... Here, at university or at school ... You are the best..
