Topic: Studying philosophy can lead to a happier and more peaceful existence.

Original Text:

Title: Philosophy

It is often argued that a happier life is a result of studying philosophy. I completely disagree with this opinion, I think it is not the right way to achieve happiness in life.

Firstly, studying philosophy is not the correct choice to have, a happy peaceful life. It causes mental health problems, it may lead to breakdowns, also makes the person always worried and nervous from everything that happens.

Secondly, when a person starts to read a lot in the philosophy world, they won't be able to stop reading. Moreover, it makes the person so far from everyone, in his own world of philosophy.

To conclude, in my opinion philosophy is not the right choice to have a peaceful and happier life.
