Topic: What do you think of climate change and how can we deal with it?

Original Text:

Title: Climate Change

The climate is a important element to our life, so when climate changes impact on people in any country.

The people don't like change weather during specific seasons, for example summer is sometimes very hot, so they go to beach to interesting by time on it because is colder than at house.

Finally, the climate is necessary to know about it to take prudence when weather changes.
